

AUTONOMOUS & CONNECTED MOBILITY

Volvo to Bring Autonomous Electric Buses to Singapore

Volvo Buses and Nanyang Technological University in Singapore signed a cooperation agreement on a research and development program for autonomous, electric, 40-foot buses. One bus will be used on Singapore's advanced new test facility for autonomous vehicles and the second bus will be used for tests in the bus depot.

VOLVO BUSES and Nanyang Technological University in Singapore have signed a cooperation agreement on a research and development program.

THE LIVERMORE Amador Valley Transit Authority celebrated the launch of testing of its new Shared Autonomous Vehicle (SAV) on June 22.

LAVTA Testing on Public Roads

The Livermore Amador Valley Transit Authority launched the testing of a shared autonomous shuttle June 22, 2018. Vehicle testing will take place on public roads in the city of Dublin, California. LAVTA and EasyMile project partners include GoMentum Station, which will oversee the entire testing process and First Transit, which will provide staffing, maintenance and operation support.

When time is of the essence...

Work smarter, not harder, with our **WASH-BOTS!**

- Turn over of buses in **RECORD TIME**
- Keep your fleet **SPOTLESS**
- Morning prep is now **FASTER**
- Alleviate time-sensitive turnaround by **33%**
- Less time spent on each vehicle = **BIGGER ROI**

The SW 101 ST is the industry standard for use with school and transit buses, coaches, and 53' trailers. Dual controls enable the unit to wash in both directions, allowing it to clean the toughest of corners. This unit will have your buses out faster and on time!
